WORK EXPERIENCE

Full Stack Developer Intern   **June 2020 - Sep. 2020**
Pixameter, Beaverton, OR

- Developed front-end and back-end services to allow patients to share health information with their medical providers through a telemedicine web application using Node.js and MongoDB.
- Integrated Google Cloud services, including the Maps API, to allow users to find nearby pharmaceutical services.

Science Teacher   **Aug. 2012 - June 2018**
Liberty High School, Hillsboro, OR, Aug. 2014 - June 2018
Westview High School, Beaverton, OR, Jan. 2014 - June 2014
JW Poynter Middle School, Hillsboro, OR, Sep. 2013 - Dec. 2013
Liberty High School, Hillsboro, OR, Aug. 2012 - June 2013

- Designed and led staff development lessons to teach best practices to other teachers within the school and newly hired teachers in the district.
- Worked on a cross-district team of science teachers and administrators to guide the district's chemistry curriculum adoption process.

ADDITIONAL PROJECTS

- Integrated test-driven development and object oriented design principals into the construction of an Android appointment book application in Java to create, organize, and search for appointments.
- Created a Flask web application on Google Cloud's App Engine utilizing Google's Vision API to automatically generate accessible HMTL image tags for uploaded photos in Cloud Storage.
- Implemented a constraint satisfaction algorithm in Python to solve Star Battle logic puzzles.
- Created a relational database in PostgreSQL of corporate data, including financial performance and board make-up, to compare the performance of companies in the Dow Jones Industrial Average.
